FROI Event Table Ver 1.2

The First Report of Injury (FROI) Event Table is designed to provide information integral for a sender to understand the receiver's EDI reporting requirements. It relates EDI information to the circumstances under which they are initiated as well as the timeframes for sending the information. These circumstances and timeframes reflect legislative mandates and specifications relative to reporting requirements based on various criteria.

Interpreting the jurisdiction's requirements: For a (Report Type) (Maintenance Type-Code) meeting (Event Rule Criteria) within (Event Rule Date range - FROM/THRU) where the (Trigger Criteria-Trigger Value), the Report is due (Report Due Value-Type) from the (Report Due-From). If the Event Rule Thru date is blank, reporting requirements apply until further notice. When a Paper Form(s) is indicated, this implies that in addition to the EDI transaction, this form(s) must be sent to the Receiver indicated.

ICMS EDI SRS Ver 1.3
Periodic Event Table Ver 1.3

The Periodic Subsequent Report of Injury (SROI) Event Table is designed to provide information integral for a sender to understand the receiver's EDI reporting requirements. It relates EDI information to the circumstances under which they are initiated as well as the timeframes for sending the information. These circumstances and timeframes reflect legislative mandates and specifications relative to reporting requirements based on various criteria.

Interpreting the jurisdiction's requirements: A (Report Type) (Maintenance Type-Code) must be filed based on the (Event Rule Criteria) within (Event Rule Date range) on Claims that meet the Report Trigger (Criteria and Trigger Value), meets the Periodic Qualifier (Status and Activity) and must be filed by the Periodic Report Due indicated (Value, Due Type, From).

* If the Event Rule Thru date is blank, reporting requirements apply until further notice.

* Periodic Report Due indicated (Value, Due Type, From) is the last day a claim administrator has to receive a "Transaction Accepted" or "Transaction Accepted with Errors" for that MTC, and not just the date on which that transaction must be triggered regardless of errors. It was suggested that the Claim Administrator trigger the reports prior to this date in order to allow time for correcting errors.

Report Type	Maintenance Type		Event Rule			Report Trigger		Periodic Qualifiers		Periodic Report Due		
	Code	Description	Criteria	From	Thru	Criteria	Trigger Value	Status	Activity	Value	Due Type	From
SROI	AN	Annual	3				1 year after sub annual report.	3				
SROI	SA	Sub-Annual	3				180 days from 1st payment report	3				

Event Rule Criteria

1=Date of Injury

2=EDI Mandate Date

3=Jurisdiction defined

Status Qualifier

1 = Open (If claim is open at time of Report Trigger)

2 = Closed (If claim has closed since the last periodic report)

3 = Either (if claim is open or has closed since the last periodic report)

Activity Qualifier

E = Either (either IL or MB)

IL = Indemnity (If Claim Type Code = Indemnity or Became Lost Time)

J = Jurisdiction defined (define details in column)

MB = Medical Only (If Claim Type Code = Medical Only or Became Medical Only)

Due Type

B = Business Days

C =Calendar Days
